

A Kara Phonology*

Perry and Ginny Schlie

I Introduction

The Kara language is spoken by approximately 4,000 people in the Kavieng subdistrict of New Ireland province. The purpose of this paper is to present a fairly complete description of Kara phonology. Some of the more interesting features of the system are the number of contrastive vowel phones, the syllabification of vowel sequences, and the use of phonemic contrasts to signal levels of transitivity.

Data Papers on Papua New Guinea Languages

Papua New Guinea

Papers in the series **Data Papers on Papua New Guinea Languages** (formerly **Workpapers in Papua New Guinea Languages**) express the author's knowledge at the time of writing. They do not necessarily provide a complete treatment of their topic. However, it is felt that these papers should be made available at this time.
